# HONEYCOMB PANEL PALLETS

Honeycomb panel pallets and their components offer a superior combination of strength and light weight compared to wooden and other pallet systems. They have the quality and performance needed to reduce overall shipping costs and increase profitability . They have the best quality and performance needed to reduce general freight costs and to increase profitability.

- Their components and tops are 60% lighter than wooden alternatives, providing ergonomic benefits and reducing freight costs.
- Due to honeycomb panel structure, their carrying capacity is high.
- One-way shipments require a one-time use solution. Honeycomb panel pallets are easily recycled with other paper products.
- Honeycomb panel pallets does not have parts such as nails, splinters or broken woods that pose a potential risk of injury and damage.
